"I would recommend this Project Management course as I have had a positive experience. It was a good introduction into project Management. I found the project management resources on the website to be a valuable tool, really liked those. When I needed help it was made available promptly. This includes both help with my subjects and technical issues. As a result of the training I now feel more comfortable in the process of building a project management plan, communicating it to my workmates effectively and implementing the plan."
